

Sonos Multi-Room Music System
Enjoy All the Music You Want, All Over Your House and
Control It All From the Palm of Your Hand

ADD MUSIC TO YOUR LIFE:

Life sounds better with music. It makes cooking more fun, cleaning less work and parties more entertaining. With the Sonos Multi-Room Music System it's easy to add music to every part of your life and every room in your house. Just put Sonos ZonePlayers in the rooms of your choice, grab a wireless Sonos Controller and pick a room, pick a song and hit play.

ALL THE MUSIC YOU WANT:

Sonos gives music lovers instant access to a world of music no matter where it comes from—your computer or the Internet or both. Now you can liberate the music on your computer or NAS and play it all over. Tune in to thousands of free Internet radio stations. And enjoy millions of songs and stations from the most popular music services.

ALL OVER YOUR HOUSE:

At Sonos, multi-room music is our mantra. That's why you can play music in every room of your house—whether you have existing audio equipment there or not. Unlike single-room media adapters that only allow you to play music in one room at a time, Sonos gives you the freedom to listen in as many rooms as you'd like—simultaneously. Play the same song in different rooms or different songs in different rooms. And you don't need a computer in every room, a music server or a wireless network to do it.

ALL FROM THE PALM OF YOUR HAND:

With a wireless Sonos Controller in hand (choose the CR100 or the Sonos Controller for iPhone or both), you can control all your music and all your rooms from anywhere in your house. Which means no more running back and forth to your computer or stereo every time you want to change the music. From the comfort of your couch, you can control the volume and music selection in each and every room individually or group zones together so everyone's dancing to the same tune. Use search to find your favorite artist, album or song. And see full-color album art, track information and more.

WIRELESS THAT WORKS:

The key to designing a music system that plays music all over the house is having a wireless network that works *all* over the house. SonosNet does just that. SonosNet 2.0, our latest wireless mesh network technology, provides double the wireless range and flawless performance so the music gets to all the right rooms — near or far. And you can control the music in any room from anywhere. No need to break through walls or undertake a massive wiring project.

THE SYSTEM:

The Sonos Multi-Room Music System has two essential components: the Sonos Controller (CR100) and Sonos ZonePlayers (ZP90 and ZP120 models), wireless digital music players that deliver superior audio all over the house. Mix and match ZonePlayers for the ultimate multi-room music experience. And combine any number of Controllers (CR100, Desktop Controller and Sonos Controller for iPhone) for maximum control and convenience

SIMPLE SETUP:

The Sonos Multi-Room Music System was engineered to work right out of the box. Setting up the system, even in multiple rooms, is simple. Connect one ZonePlayer (or ZoneBridge) to your router and all the rest will work wirelessly. The ZP90 can be connected directly to your home theater, stereo or any other amplified audio device. The ZP120 has a state of the art 110W built-in amplifier so all you need is a pair of speakers. Now, with a Controller in hand, simply pick a room, pick a song or radio station and hit play.

SHIPPING WITH MILLIONS OF SONGS

Every Sonos system includes free 30-day trials to Napster, Rhapsody and SIRIUS Internet Radio. No signup or credit card required. Plus, we've included more than 15,000 Internet radio stations and Last.fm and Pandora services, free of charge. Sonos connects directly to these services over the Internet so music fans will have instant access to millions of songs and stations—no downloading or PC required.

AVAILABILITY:

The Sonos Multi-Room Music System is sold online at www.sonos.com and via more than 3000 retailers worldwide. The ZP90 retails for \$349.00, the ZP120 for \$499.00 and the Sonos Controller CR100 for \$399.00. Sonos has a 2-room bundle – the Sonos BU150 - that includes a ZP90, a ZP120 and a Controller for just \$999.00. The Sonos Controller for iPhone is a free application that can be downloaded on the App Store.

ABOUT SONOS, INC.:

Sonos® is the leading developer of wireless multi-room music systems for the home. The Sonos Multi-Room Music System is the first, wireless multi-room music system that lets you play all the music you want all over your house – and control it all from the palm of your hand. By partnering with services like Audible.com®, eMusic®, Last.fm, Napster®, Pandora®, RadioTime, Rhapsody®, SIRIUS® Internet Radio, and more, Sonos gives music lovers instant access to millions of songs and thousands of radio stations. In addition, Sonos liberates the music stored on a computer so it can be enjoyed all over the house. The Sonos Multi-Room Music System is available at more than 3000 retailers in over 55 countries worldwide; or direct at www.sonos.com. Sonos is privately-held and headquartered in Santa Barbara, CA with offices in Cambridge, MA, Hilversum, Netherlands and Penang, Malaysia.
