

### Features - Sonos Controller for iPhone™

#### Wireless, multi-room control from your iPhone or iPod touch

Integrated, multi-room control	Lets you control what music is playing in every room in your house. Control of your music is not tied to the room where you're listening.
Wireless connectivity*	The iPhone and iPod touch connect to your Sonos system through your home WiFi network.
Unique design dedicated to multi-room music control	Everything about the application is carefully designed to let you control your music anywhere and everywhere.
Find out what's playing anywhere in your home	The Now Playing screen shows you what's playing in the rooms you're in with details like album art and track titles. The Zone Menu gives you an overview of what's playing in each room of the house at a glance.
Flexible playback options	Control what zone or group of zones plays the music selected. Put it in "Party Mode" to play the same songs all over the house. Set shuffle/repeat playback as desired.

#### Instant access to endless music

Plug-and-play access to millions of songs	Get instant access to millions of songs that you can enjoy all over your house. No ripping, downloading or computer required.
Liberate the music on your computer	Sonos can play music stored on up to 16 PCs, Macs, NAS (Network Attached Storage) devices on your home network,

and enjoy it in every room	supporting the most popular audio formats.
Audio formats supported	Support for compressed MP3, WMA (including purchased Windows Media downloads), AAC (MPEG4), iTunes, Ogg Vorbis, Audible (format 4), Apple Lossless, Flac (lossless) music files, as well as uncompressed WAV and AIFF files. Native support for 44.1kHz sample rates. Additional support for 48kHz, 32kHz, 24kHz, 22kHz, 16kHz, 11kHz, and 8kHz sample rates. Note: Previously purchased Apple "Fairplay" DRM-protected songs may need to be upgraded. See Apple for details. WMA Lossless format not currently supported.
PC-free access to Internet radio and online music services	Listen to millions of songs and Internet radio stations all over your house, without turning on a computer.
Free Internet radio	Comes loaded with more than 25,000 free radio stations, shows and podcasts. Browse the Radio guide for local and international stations or use Search to find something specific.
Play music or audio from MP3 players, CD players, TV, DVD, VCR, and radio throughout the house	An analog audio input with digital encoding on every ZonePlayer lets you play music from an external audio source (such as an MP3 player, CD player, TV, or radio) and enjoy throughout the house.
Support for the most popular music services	Last.fm, Napster®, Pandora®, Rhapsody® 3.0+, SIRIUS® Internet Radio, and downloads from any service offering DRM-free tracks.

## Features - Sonos Controller for iPhone™

### Wireless, multi-room control from your iPhone or iPod touch

---

#### Find, discover, and control your favorite music with touch-screen simplicity

Browse through music selections	Use the familiar point and flick to browse through your music collection and favorite music services by Artist, Album, Genre, Track Name, Composer, or Playlist.
Search	Type on the touch screen to quickly find the music you want to hear. Search for the artist, album or track within your personal music collection or favorite music service.
Power scroll	Lets you browse through your music collection alphabetically so you can quickly find your favorites.
Display of album art	Album art is displayed in full-color.
Single library view	Regardless of where your music is stored, Sonos presents a single view of your entire library (all artists, albums, composers, genres, etc).
Queue-based music playback	You can queue-up music to play next while listening to what's playing now.

---

#### Other cool features

Wake up to music	Set the alarm and wake up to your favourite music or Internet radio station in one room, or all over the house. Just hit snooze to get a few minutes more sleep. Fall asleep
